

NO MATTER HOW SHALLOW

A child can drown in less than two inches of water!

It only takes seconds for your baby to slip underwater and stop breathing. From bathtubs to toilets and even buckets; potential dangers are everywhere!

Always keep your child within reach when near water. Whether it's a phone call or someone at the door - take your child with you. Every second counts.

For more information and tips on water safety, call 813-229-2884...
